- Work-In-Process**
- Display**

Wire mesh protects items stored or transported in this mobile security cage. Leaf style hinge construction prevents entry by sneaky hands - with minimal gaps at hinge locations. In over-the-road applications this cart is often used for securing unattended deliveries. Unitized cartloads speed loading and unloading times and reduce loss by theft. The locking door handle, which operates locking rods on both the top closure and bottom shelf, will accept either padlock or truck door seal. The right hand door is intentionally solid to prevent tampering. With 2 swivel and 2 rigid casters and finished with a bright zinc electroplated lacquer dip finish, this security cart not only protects your products, but looks good doing it. It also features a bill pocket with top flap and plexiglass front. Cart folds for compact storage when not in use.
