

**Two Shelf, Two Sided Cart F-49**

- Distribution**
- Stocking**
- Work-In-Process**
- Display**

This 1,000 lb capacity cart is held captive at manufacturing sites or retail locations to move large volumes of product internally from point to point. The upright vertical design with an upper shelf for product separation and access can accommodate up to 38 average size cases and allows for easy access from both sides of the cart. With its stretched footprint and inclusion of both swivel and rigid casters, this cart is highly maneuverable in narrow spaces. Empty carts fold down for space saving storage in warehouse racks or for secure storage in vehicles during transport. The cart also features a chalkboard for product identification purposes and a customizable nameplate. Finished with a bright zinc electroplated, lacquer dip, this cart is an invaluable addition to any operation.
