This CannonCart® features detachable exterior panels that can be customized for branding purposes and used for in-store applications. As a standard security cart this creates an attractive and secure in-store storage space that can be utilized for a number of different applications: easily secure high value items waiting for customer pick-ups or use as a secure cage for other high value items in your store. When not in use or when not needed, employees can simply roll the cart into the storage/backroom.
