

Direct Store Delivery Cart w/Attached Hand Truck

- Distribution**
- Stocking**
- Work-In-Process**
- Display**

This versatile cart is used to move product internally and externally. It is designed to optimize direct store delivery applications by using the CannonCart® to transport goods from your facility to the delivery point, and then utilize the on-board hand truck to save time once at the delivery point. This eliminates return trips to the truck and decreases time spent at each delivery location.

This cart is easily maneuverable with four (4) swivel casters, one with a position lock. This position lock can easily be released to move the cart in multiple directions. With a folding depth of 7.5" (not with hand truck) this cart can be folded and stored away during backhaul or in backrooms, taking up less space. A document pocket allows for quick identification of items.

Depth	26"	Casters	(4) Rubber TPR
