Our CO2 cylinder carriers offer several heavy duty construction features that meet the DOT Code of Federal Regulations for safe and efficient transportation of compressed gases. From the rigid welded frames constructed of heavy gage square steel tubing to their ability to serve double duty as returnable pallets, Cannon Equipment's CO2 carriers are a safe and an approved way to transport compressed gases. This custom designed vertical CO2 cylinder carrier handles up to 16 cylinders in a 4x4 pattern. These units are stackable, saving valuable floor and truck space.
